Career Objective

To pursue a creative and challenging career where I can apply my skills and talents.

Project: Visualizing log files in the form of charts.

This project aims to utilize log files to portray insights so that the client can tweak the functioning of the organization for the overall enhancement of productivity. This is done by visualizing the log files in the form of charts.

We are using Talend to automate the cleanup process as well as to re-index the data on Solr. We are performing queries on Solr to get the required data according to the requirements of the charts.

Tools used: Talend, Solr, Apache Tomcat Server

Technologies used: BigData, Java, html5, JSP, JavaScript, Servlets, CSS

Education

- Masters of Sciences from International Institute of Information Technology, Hyderabad
 - Information Technology | 7.88 | 2013 - current
- Bachelors of Technology from National Institute Of Technology, Allahabad (MNNIT)
 - Production & Industrial Engineering | 5.91 | 2007 - 2011
