- **Board of Secondary Education**   *(2006)* 81%

PROJECT DETAILS

MULTI CLASS CLASSIFICATION OF DOCUMENTS:

It is a java based application, using UIMA framework and language processing tools, which will help the user to input a document and our system provides summary of that document by classifying it into predefined classes. After a document is classified, user will be able to see those phrases/ sentences in the document which are more responsible for the obtained summary or classification.

Framework: UIMA
Languages: java

FORM BUILDER:

Using Form builder software on can design their own forms. It gives drag and drop functionality to rearrange the elements in the form. It also builds the database automatically.
Technologies Used: Servlet, JSP, Java Script
Databases: SQL

AUTOMATIC INFORMATION EXTRACTION FROM HTML DOCUMENTS:

This paper proposes a system that employs clustering techniques for automatic Information(doc, docx, pdf files) Extraction from HTML documents containing semi structured data.
Technologies Used: Java Script

STRENGTHS

- Self Motivation
- Team leading capability
- Positive Attitude

SKILL SET

- Programming Languages   : C, C++ ,JAVA , HTML, JAVA SCRIPT,JSP

- Strong analytical skills and problem solving skills.
